CONTENTS

No. 1, January, 1953

Formation of Esters by Yeast. I. The Production of Ethyl Acetate by Standing Surface Cultures of *Hansenula anomala*. Joseph Tabachnick and M. A. Joslyn 1

Infrared Spectrophotometry of Enteric Bacteria. Seymour Levine, Heber J. R. Stevenson, Leslie A. Chambers and Bernard A. Kenner 10

A Rapid Cell Volume Assay for Fungitoxicity Using Fungus Spores. G. R. Mandels and R. T. Darby 16

Studies of Mutability in Nutritionally Deficient Strains of *Escherichia coli*. I. Genetic Analysis of Five Auxotrophic Strains. M. Demerec and Elise Cahn 27

The Metabolism of Species of *Streptomyces*. VI. Tricarboxylic Acid Cycle Reactions in *Streptomyces coelicolor*. Vincent W. Cochrane and Harry D. Peck, Jr. 37

Influence of the Concentration of Iron on the Production of Fluorescin by *Pseudomonas aeruginosa*. John R. Totter and Frederick T. Moseley 45

Studies on Certain Species of Bacteria Assigned to the Genus *Chromobacterium*. James P. Gilman 48

Lysogenicity of *Bacillus megaterium*. M. R. De Carlo, W. B. Sarles, and S. G. Knight 53

Variants of *Streptomyces griseus* Induced by Ultraviolet Radiations. R. C. Pittenger and Elizabeth McCoy 56

Factors Which Affect the Oxidation of Benzoic Acid by a Strain of *Pseudomonas aeruginosa*. Frederick Bernheim and William E. DeTurk 65

Growth Curves of *Salmonella pullorum* in Different Media. Delbert E. Schoenhard and Henrik J. Stafseth 69

The Fermentation of Sucrose by *Leuconostoc mesenteroides*. D. M. Giglio and C. S. McCleskey 75

The Nutritional Requirements of *Acetobacter melanogenum* and Related Species. I. Omar Foda and Reese H. Vaughn 79

The Effect of Glycine and Protoporphyrin on a Cytochrome Deficient Yeast. Martynas Yčas and Theodore J. Starr 83

The Germicidal Activity of Some Pyridinium Salts Containing Unsaturated Hydrocarbon Radicals. M. Damodaran and C. SivaRaman 89

Studies on the Metabolism of *Mycobacterium tuberculosis*. I. The Effect of Carbohydrates and Alcohols on the Growth of *Mycobacerium tuberculosis* var. *hominis*. Guy P. Youmans and Anne S. Youmans 92

Studies on the Metabolism of *Mycobacterium tuberculosis*. II. The Effect of Compounds Related to the Kreb's Tricarboxylic Acid Cycle on the Growth of *Mycobacterium tuberculosis* var. *hominis*. Anne S. Youmans and Guy P. Youmans 96

Studies on the Metabolism of *Mycobacterium tuberculosis*. III. The Growth of *Mycobacterium tuberculosis* var. *hominis* in the Presence of Various Intermediates of the Dissimilation of Glucose to Pyruvic Acid. Anne S. Youmans and Guy P. Youmans 100

Studies on Bacterial Resistance to Inhibition and Killing by Phenol. Heinz Berger and Orville Wyss 103

Consequences of Official Opinions on Bacteriological Nomenclature. S. T. Cowan 111

No. 2, February, 1953

Host Controlled Variation in Bacterial Viruses. G. Bertani and J. J. Weigle 113

A Single Adaptive Enzyme in *Saccharomyces* Elicited by Several Related Substrates. Norberto J. Palleroni and Carl C. Lindegren 122

The Effect of X-Radiation on the Respiration of *Escherichia coli*. Daniel Billen, G. E. Stapleton and Alexander Hollaender 131

Studies on the Dextransucrase of *Leuconostoc dextranicum*. Warner W. Carlson, Carmen L. Rosano, and Virginia Whiteside-Carlson 136

The Effect of Temperature on the Nutritional Requirements of Facultative and Obligate Thermophilic Bacteria. L. Leon Campbell, Jr. and O. B. Williams 141

Observations on the Biotin Requirement of Thermophilic Bacteria. L. Leon Campbell, Jr. and O. B. Williams 146

A Method for Preparing Permanent Stained Mounts of Pathogenic Fungi for Microscopic Examination. Albert M. Kligman and Florence S. Lewis 148
Production of Phenocopies in *Aerobacter aerogenes* by Ultraviolet Radiation. Amos Norman 151
Growth Inhibitory Action of Copper for *Mycobacterium phlei*. Darrell Pratt 157
Studies on the Spores of Aerobic Bacteria. I. The Occurrence of Alanine Racemase. Babette Taylor Stewart and H. Orin Halvorson 160
Details of Frozen-Dried T3 and T7 Bacteriophages as Shown by Electron Microscopy. Dean Fraser and Robley C. Williams 167
Pathogenesis of *Candida albicans* Infection Following Antibiotic Therapy. I. The Effect of Antibiotics on the Growth of *Candida albicans*. M. Huppert, D. A. MacPherson and J. Cazin 171
Radioactive Sulfur Tracer Studies on the Reproduction of T4 Bacteriophage. O. Maaløe and N. Symonds 177
Effect of Vitamin B_{12} Derivatives on Oxidation and Vitamin Uptake by *Escherichia coli*. Evelyn L. Oginsky and Patricia H. Smith 183
The Nature of the Adaptive Lag of *Pseudomonas fluorescens* Toward Citrate. James T. Barrett, A. D. Larson and R. E. Kallio 187
Characterization of Some Thermophilic Bacteria from the Hot Springs of Yellowstone National Park. Connell L. Marsh and Don H. Larsen 193
The Isoelectric Point of Bacterial Cells. Virginia P. Harden and John O. Harris 198
The Nutritional Requirement of Threonineless Mutants of *Escherichia coli*. H. Edwin Umbarger 203
Differentiation of *Alcaligenes faecalis* from *Brucella bronchisepticus* by Biochemical and Nutritional Methods. John A. Ulrich and Gerald M. Needham 210
Production of Nitrite from Ammonia by Methane Oxidizing Bacteria. William E. Hutton and Claude E. Zobell 216
Notes:
Rediscovery of *Bacillus badius* Batchelor. Marzieh Saghafi and M. D. Appleman 220
Transamination in Cell-Free Extracts of Effective and Parasitic Rhizobia. D. C. Jordan 220
The Essential Characteristics of the Species *Clostridium hemolyticum*. Louis Ds. Smith 222
Induced Variation in the g Phases of Somatic Group B of the Genus *Salmonella*. D. W. Bruner 222
Apparent Multiplication of the Lansing Poliomyelitis Virus in Cortisone Treated Chick Embryos. Wolcott B. Dunham and Frances M. Ewing 224
Type-Specificity of "Immunological Paralysis" Induced in Mice with Pneumococcal Type II Polysaccharide. Perry Morgan, Dennis W. Watson and William J. Cromartie 224
A Modified Egg Yolk Medium for Detecting Lecithinase Producing Anaerobes in Feces. K. R. Johansson 225
A Quantitative Theory of Influenza Virus Hemagglutination-Inhibition: Erratum. Frank Lanni and Yvonne Théry Lanni 226

No. 3, March, 1953

Obituary: F. C. Harrison. E. G. D. Murray 227
Microbial Thermogenesis in the Decomposition of Plant Materials. IV. Influence of Moisture Content and of Initial Temperature. W. V. Bartholomew and A. G. Norman 228
Oxidation of Maltose by *Acetobacter melanogenum*. I. Omar Foda and Reese H. Vaughn 233
Evidence for the Coenzymatic Nature of a Synthetic Cofactor Involved in the Biotin Related Deaminase Systems. Virginia R. Williams and John F. Christman 238
Reduction of Tetrazolium Salts by Pleuropneumonialike Organisms. Norman L. Somerson and Harry E. Morton 245
Growth, Respiration, and Nucleic Acid Synthesis in Ultraviolet-Irradiated, and in Photoreactivated *Escherichia coli*. Albert Kelner 252

Variation in Shape and Arrangement of Bacterial Flagella. Einar Leifson and Rudolph Hugh 263
Demonstration of Yeast Bud Scars with the Electron Microscope. J. W. Bartholomew and Tod Mittwer 272
Vitamin Requirements of *Hansenula* Yeasts in Relation to Their Phylogeny. Yaye Furutani, R. F. Betz and L. R. Hedrick 276
A Method for the Microscopical Study of Actinomycetes. Giovanni Giolitti and Mariangela Bertani 281
Comparative Biochemistry of the Hydrogen Bacteria. I. The Simultaneous Oxidation of Hydrogen and Lactate. Elizabeth Wilson, Helen A. Stout, Dorothy Powelson and Henry Koffler 283
The Action of Aureomycin on the *Escherichia coli* Bacteriophage T_2 System. Robert A. Altenbern 288
Staling in Bacterial Cultures. William R. Lockhart and Dorothy M. Powelson 293
Oxidation of Acetate by *Ashbya gossypii*. M. N. Mickelson and M. N. Schuler 297
Radiation Sterilization. I. The Effect of High Energy Gamma Radiation from Kilocurie Radioactive Sources on Bacteria. William Tarpley, Jan Ilavsky, Bernard Manowitz and Robert V. Horrigan 305
Response of *Aerobacter aerogenes* Methionine Auxotrophs to Adenine Thiomethyl Compounds. Stanley K. Shapiro 310
Reduction of Chloromycetin and Related Compounds by *Escherichia coli*. Grant N. Smith and C. S. Worrel 313
A Citric Acid Cycle in *Propionibacterium pentosaceum*. E. A. Delwiche and S. F. Carson 318
Calcium as a Growth Stimulant for *Lactobacillus casei*. Charles H. Eades, Jr. and Madelyn Womack 322
Studies on the Nutritional Requirements of the Fusobacteria. I. An Active Principle Present in Yeast Extract. Robert R. Omata 326
Development of Bacteriophage in X-Ray Inactivated Bacteria. Louis W. Labaw, Vernon M. Mosley ahd Ralph W. G. Wyckoff 330
Inhibition of the Anaerobic Pyruvate Metabolism of *Escherichia coli* by Dihydrostreptomycin. Ingrid L. Barkulis 337
Effect of Carbon Dioxide and Aging on the Dihydrostreptomycin Inhibition of Pyruvate Fermentation in *Escherichia coli*. Eugene Zebovitz and James W. Moulder 344
A Modification of the Penicillin Technique for the Selection of Auxotrophic Bacteria. Edward A. Adelberg and John W. Myers 348
Note:
Induction of Mutations to Antibiotic Resistance in Bacteria. Felix L. Haas, Orville Wyss, Heinz Berger and Wilson S. Stone 354

No. 4, April, 1953

Enzymatic Changes During Sporogenesis in Some Aerobic Bacteria. W. A. Hardwick and J. W. Foster 355
Reversal by Complex Natural Materials of Growth Inhibition Caused by Antibiotics. J. W. Foster and Robert F. Pittillo 361
Oxidation of Amino Acids and Compounds Associated with the Tricarboxylic Acid Cycle by *Neisseria gonorrhoeae*. Nicholas E. Tonhazy and Michael J. Pelczar, Jr. 368
Observations on the Nucleus of Resting and Germinating Spores of *Bacillus megaterium*. Carl F. Robinow 378
Effects of X-rays on the Formation of Lactase in a Lysogenic Strain and a Sensitive Strain of *Escherichia coli*. Charles Yanofsky 383
α-Ketoisovaleric Acid, a Precursor of Pantothenic Acid in *Escherichia coli*. Werner K. Maas and Henry J. Vogel 388
Spontaneous and Induced Color Variation in the HY Strain of *Serratia marcescens*. Edgar L. Labrum and Mary I. Bunting 394
Nutrition of the Acetic Acid Bacteria. M. R. Raghavendra Rao and J. L. Stokes 405
Response of *Escherichia coli* to Ferrous Ions. I. Influence of Temperature on the Mutagenic Action of Fe^{++} for a Streptomycin-Dependent Strain. B. Wesley Catlin 413

Response of *Escherichia coli* to Ferrous Ions. II. Influence of Nitrogen and Oxygen on the Mutagenic and Lethal Effects of Fe^{++} for a Streptomycin-Dependent Strain. B. Wesley Catlin 422
Microbacterium thermosphactum spec nov; a Nonheat Resistant Bacterium from Fresh Pork Sausage. Ruth A. McLean and William L. Sulzbacher 428
Unique Sensitivity of a Pantothenicless Mutant of *Neurospora* to Constituents of the Growth Medium. Francis J. Ryan, Calvin Kunin, Robert Ballentine and Werner Maas 434
Mechanism of Phenylacetylcarbinol Synthesis by Yeast. Paul F. Smith and David Hendlin 440
Comparative Methods for the Study of Bacterial Polysaccharides. William J. Payne, Stephen J. Gagan and Arthur L. Pollard 446
The Relationships of Viral Content of Living and Dead Whole Eggs Inoculated with Various Concentrations of Psittacosis Virus. Marvin K. Nadel and Oliver N. Fellowes 449
The Role of Bacterial Resistance in Antibiotic Synergism and Antagonism. Morton Klein and Sonia E. Schorr 454
Investigations on the Biosynthesis of Citrovorum Factor by Lactic Acid Bacteria. David Hendlin, Leah K. Koditschek and Margaret H. Soars 466
Synthesis of Glutamic Acid and Glutamyl Polypeptide by *Bacillus anthracis*. III. Factors Affecting Peptide Production in Synthetic Liquid Media. Curtis B. Thorne, Carmen G. Gómez, George R. Blind and Riley D. Housewright 472
Notes:
The Influence of Ultraviolet Light and Chlorophyll on the Synthesis of Pigment by *Bacterium prodigiosum* (*Serratia marcescens*). Amato Novelli 479
The Susceptibility of Mice Infected with *Cryptococcus neoformans* to Encephalomyocarditis Virus. George H. Scherr 480
Production of Catalase by the Pediococci. Eileen A. Felton, James B. Evans and C. F. Niven, Jr. 481
The Identity of "*Leuconostoc citrovorum*, Strain 8081". Eileen A. Felton and C. F. Niven, Jr. 482

No. 5, May, 1953

Genetic Studies on the Development of Streptomycin Resistance in *Pasteurella pestis*. E. D. Garber, Kathryn Noble and N. Carouso 485
The Phosphogluconate Pathway of Carbohydrate Metabolism in the Multiplication of Bacterial Viruses. Seymour S. Cohen and Lorraine Roth 490
The Effect of Free Amino Acid Pool Levels on the Induced Synthesis of Enzymes. Harlyn O. Halvorson and S. Spiegelman 496
The Effect of β-Propiolactone on the Metabolism of *Blastomyces dermatitidis*. Glen R. Gale 505
Pigment Production by *Haemophilus parapertussis*. P. W. Ensminger 509
Hydrogenase and Nitrogenase in Azotobacter. Margaret Green and P. W. Wilson 511
Electrophoretic Behavior and Crystal Violet Adsorption Capacity of Ribonuclease-Treated Bacterial Cells. John O. Harris 518
Properties of Hydrogenase from *Azotobacter vinelandii*. L. A. Hyndman, R. H. Burris and P. W. Wilson 522
The Somatic Antigens of *Corynebacterium michiganense* and *Corynebacterium insidiosum*. Stanley A. Rosenthal and Charles D. Cox 532
Effect of Sodium Azide on Radiation Damage and Photoreactivation. Heinz Berger, Felix L. Haas, Orville Wyss and Wilson S. Stone 538
The Nitrogen Metabolism of Certain Strains of *Mycobacterium tuberculosis*. Frederick Bernheim, William E. DeTurk and Hilda Pope 544
Rumen Organisms. I. Curved Rods and a Related Rod Type. C. N. Huhtanen and L. S. Gall 548
Rumen Organisms. II. Two Lactate Utilizers and Six Miscellaneous Types. C. N. Huhtanen and L. S. Gall 554

Metabolism and Nutrition of *Clostridium feseri*. Lewis W. Jones and C. E. Clifton..... 560
The α-Ketoglutaric Oxidase System of Azotobacter. E. S. Lindstrom..... 565
The Antigenic Composition of *Cryptococcus neoformans*. IV. The Use of Paper Chromatography for Following Purification of the Capsular Polysaccharide. E. Edward Evans and Robert J. Theriault..... 571
Interrelationship Between Thioctic Acid, L-Lyxoflavin, and Riboflavin in *Streptococcus faecalis*. C. H. Hill..... 578
The Metabolism of Brucellae: The Role of Cellular Permeability. Philipp Gerhardt, D. R. MacGregor, A. G. Marr, C. B. Olsen and J. B. Wilson..... 581
Tracer Studies of Formate Metabolism in Fungi. W. E. Jefferson and J. W. Foster..... 587
Cytokinesis in *Gaffkya tetragena*. H. L. Chance..... 593
Surface Activity as the Cause of the Anomalous Behavior of Urethane as an Inhibitor of Yeast Respiration. Carl Lamanna and Jack J. R. Campbell..... 596
Net Utilization of Free Amino Acids During the Induced Synthesis of Maltozymase in Yeast. Harlyn O. Halvorson and S. Spiegelman..... 601
The Nutritional Requirements of Treponemata. V. A Detoxified Lipide as the Essential Growth Factor Supplied by Crystallized Serum Albumin. Vance I. Oyama, Harry G. Steinman and Harry Eagle..... 609
Note:
The Formic Hydrogenlyase System of *Aerobacter aerogenes*. Herman C. Lichstein and Ruth B. Boyd..... 617

No. 6, JUNE, 1953

The Occurrence of Mitosis in *Bacillus megaterium* and Its Relation to the Growth Cycle. Ernst H. Beutner..... 619
Flagellum and Motility of *Spirillum serpens*. Adrianus Pijper, Clarice G. Crocker, Joh. P. van der Walt and Nerina Savage..... 628
Specific Agglutination of *Spirillum serpens*. Adrianus Pijper, Clarice G. Crocker, Joh. P. van der Walt and Nerina Savage..... 636
The Establishment of Lysogenicity in *Escherichia coli*. Margaret Lieb..... 642
Pigment Formation by *Bacterium salmonicida*. Philip J. Griffin, S. F. Snieszko and S. B. Friddle..... 652
Some Factors Affecting the Nutritional Requirements of *Streptococcus faecalis*. Thomas A. McCoy and Simon H. Wender..... 660
Methionine-Requiring Mutants of *Saccharomyces cerevisiae*. S. Pomper..... 666
Nutritional Studies with *Lactobacillus fermenti*. Neva Snell and J. C. Lewis..... 671
Quantitative Adsorption of Crystal Violet. E. R. Kennedy and J. F. Barbaro..... 678
Species Differentiation of Oral Lactobacilli from Man Including Descriptions of *Lactobacillus salivarius* nov spec and *Lactobacillus cellobiosus* nov spec. Morrison Rogosa, R. F. Wiseman, Joyce A. Mitchell, M. N. Disraely and assisted by A. J. Beaman..... 681
Streptococcal β-Glucuronidase. Ralph F. Jacox..... 700
Light and Electron Microscopic Studies of *Escherichia coli*-Coliphage Interactions. III. Persistence of Mitochondria and Reductase Activity During Infection of *Escherichia coli* B with T2 Phage. Philip E. Hartman, Stuart Mudd, James Hillier, and Ernst H. Beutner..... 706
Cytological Effects of Infection with T5 and Some Related Phages. R. G. E. Murray and J. F. Whitfield..... 715
Induced Resistance to Gamma Irradiation in *Escherichia coli*. Elmer L. Gaden, Jr. and Ernest J. Henley..... 727
The Nutritional Requirements of *Lactobacillus bifidus* and *Lactobacillus leichmannii*. Helen R. Skeggs, Charlotte A. Driscoll, Helga N. Taylor and Lemuel D. Wright... 733
Preliminary Studies into the Conditions Controlling Cellular Fusion and Secondary Colony Formation in *Bacillus megaterium*. Edward D. DeLamater and Mary Elizabeth Hunter..... 739
Notes:
Neisseria caviae nov spec. Michael J. Pelczar, Jr..... 744

Effect of Thioctic Acid on the Incorporation of Carbon Dioxide into Pyruvate. Gerald R. Seaman 744
Occurrence and Identification of Nonpigmented Strains of *Pseudomonas aeruginosa* in the Clinical Laboratory. W. L. Gaby and Elizabeth Free 746
Relation of O Antigen to Polysaccharide Polar Bodies of *Enterobacteriaceae*. J. F. Lutteringer and C. E. Lankford 746
Characteristic Alterations of the Budding Process of Saccharomyces Induced by Ultraviolet Treatment. G. Fred Townsend and Alvin Sarachek 747
Effect of Certain Antibacterial Agents on the Infrared Spectrum of *Micrococcus pyogenes* var. *aureus*. John Hays Bailey, Catherine M. Martini and F. C. Nachod ... 750
A Classification of the Hemolytic Bacteria of the Genus *Haemophilus: Haemophilus haemolyticus* Bergey *et al.* and *Haemophilus parahaemolyticus* nov spec. Margaret Pittman 750
Nonantigenicity of the Protein Growth Factor Required by Certain Pleuropneumonia-like Organisms. Paul F. Smith, Harry E. Morton and Robert Keller 751
Index of Authors 753
Index of Subjects 757
Contents of the Volume iii

ZoBell, Claude E., 216

Acetate, oxidation of, by *Ashbya gossypii*, 297
Acetic acid bacteria, nutrition of, 405
Acetobacter gluconicum, nutrition of, 405
— *melanogenum*, nutrition of, 79, 405
— —, oxidation of maltose by, 233
— *oxydans*, nutrition of, 79
— *rancens*, nutrition of, 79, 405
— *subozydans*, nutrition of, 405
cis-Aconitic acid, effect of, on growth of *Mycobacterium tuberculosis*, 96
Actinomycetes, microscopic study of, 281
Adaptation of *Micrococcus pyogenes* var. *aureus* to phenol, 103
Adaptive enzyme in *Saccharomyces* strains, 122
— lag of *Pseudomonas fluorescens* toward citrate, nature of, 187
Adenine thiomethyl compounds, response of methionine auxotrophs of *Aerobacter aerogenes* to, 310
Adsorption of crystal violet by bacteria, 678
Aerobacter aerogenes, electrophoretic mobility of, 518
— —, formic hydrogenlyase system of, 617
— —, infrared spectra of, 10
— —, isoelectric point of, 198
— —, production of phenocopies in, by ultraviolet radiation, 151
— —, response of methionine auxotrophs of, to adenine thiomethyl compounds, 310
— —, staling in cultures of, 293
Aeromonas hydrophila, variation in shape and arrangement of flagella of, 263
— *liquefaciens*, variation in shape and arrangement of flagella of, 263
Agglutination of *Spirillum serpens*, nonfunction of flagellum in, 636
Aging, effect of, on dihydrostreptomycin inhibition of pyruvate metabolism in *Escherichia coli*, 344
Alanine racemase, occurrence of, in *Bacillus terminalis*, 160
Alcaligenes faecalis, differentiation of, from *Brucella bronchisepticus*, 210
— —, electrophoretic mobility of, 518
Alcohols, effect of, on rate of growth of *Mycobacterium tuberculosis*, 92, 96, 100
Amino acid pool levels, effect of, on induced synthesis of maltozymase, 496
— — requirements of *Bacillus coagulans*, 141, 146
— — — — *Bacillus globigii*, 141
— — — — *Bacillus stearothermophilus*, 141, 146
— acids, oxidation of, by *Neisseria gonorrhoeae*, 368
— —, role of, in nutrition of *Streptococcus faecalis*, 660
— —, utilization of, during synthesis of maltozymase in *Saccharomyces cerevisiae*, 601
Ammonia, assimilation of, by *Mycobacterium tuberculosis*, 544
—, production of nitrite from, by methane oxidizing bacteria, 216
Anaerobes in feces, modified medium for detecting lecithinase in, 225
Antagonism of antibiotics, role of bacterial resistance in, 454
Antibiotic resistance in bacteria, induction of mutations to, 354
— synergism and antagonism, 454
Antibiotics, effect of, on growth of *Candida albicans*, 171
—, reversal of growth inhibition of, by natural materials, 361
Antigen, relation of O, to polysaccharide polar bodies of *Enterobacteriaceae*, 746
Antigens of *Cryptococcus neoformans*, 565
— — *Spirillum serpens*, 636
—, somatic, from *Corynebacterium michiganensis* and *Corynebacterium insidiosum*, 532
Ashbya gossypii, oxidation of acetate by, 297
Aspartic acid deaminase of *Bacterium cadaveris* 238
Aspergillus wentii, metabolism of formate by, 587
Assay of fungicides using spores of *Myrothecium verrucaria*, 16
Aureomycin, action of, on bacteriophage T3 system, 288
—, reversal of action of, by natural materials, 361
—, stimulation of growth of *Candida albicans* by, 171
—, synergism and antagonism of, with other antibiotics, 454

Auxotrophic bacteria, penicillin technique for selection of, 348
Azotobacter agile, hydrogenase in, 511
— —, nitrogenase in, 511
— *chroococcum*, electrophoretic mobility of, 518
— —, isoelectric point of, 198
— *vinelandii*, α-ketoglutaric oxidase system of, 565
— —, nitrogenase in, 511
— —, properties of hydrogenase in, 511, 522

Bacillin, reversal of action of, by natural materials, 361
Bacillus alvei, isoelectric point of, 198
— *anthracis*, nutrition of, 472
— —, synthesis of glutamic acid and glutamyl polypeptide by, 472
— *badius*, rediscovery of, 220
— *brevis*, isoelectric point of, 198
— *cereus*, electrophoretic mobility of, 518
— —, enzymatic changes during sporogenesis of, 355
— —, isoelectric point of, 198
— —, staling in cultures of, 293
— *coagulans*, nutrition of, 141, 146
—, conservation of genus, 111
— *globigii*, nutrition of, 141
— *lacticola*, enzymatic changes during sporogenesis of, 355
— *megaterium*, cellular fusion and secondary colony formation in, 739
— —, electrophoretic mobility of, 518
— —, enzymatic changes during sporogenesis of, 355
— —, isoelectric point of, 198
— —, mitosis in, relationship of growth cycle and, 619
— —, nucleus of resting and germinating spores of, 378
— *mycoides*, enzymatic changes during sporogenesis of, 355
— *polymyxa*, isoelectric point of, 198
— *pumilis*, isoelectric point of, 198
— *sphaericus*, isoelectric point of, 198
— *stearothermophilus*, nutrition of, 141, 146
— *subtilis*, electrophoretic mobility of, 518
— —, isoelectric point of, 198
— *terminalis*, isoelectric point of, 198
— —, occurrence of alanine racemase in, 160
Bacterial polysaccharides, methods for study of, 446
— viruses, host controlled variation in, 113
Bacteriological nomenclature, official opinions on, 111
Bacteriophage, action of, in *Escherichia coli*, 642
—, cytology of bacteria during infection with, 715
—, development of, in X-ray inactivated bacteria, 330
—, host controlled variation in, 113
—, persistence of mitochondria and reductase in *Escherichia coli* during infection with T2, 706
—, phosphogluconate pathway of carbohydrate metabolism of, 490
—, radioactive tracer studies on reproduction of T4, 177
— T3 system, action of aureomycin on, 288
Bacteriophages, electron microscopy of T3 and T7, 167
Bacterium cadaveris, amino acid deaminase of, 238
—, conservation of genus, 111
— *salmonicida*, pigment formation by, 652
Benzoic acid, oxidation of, by *Pseudomonas aeruginosa*, 65
Biotin requirements of *Bacillus coagulans*, 141, 146
— — — — *stearothermophilus*, 141, 146
Blastomyces dermatitidis, effect of β-propiolactone on metabolism of, 505
Brucella abortus, role of cellular permeability in metabolism of, 581
— *bronchisepticus*, differentiation of, from *Alcaligenes faecalis*, 210
Bud scars on yeast, electronmicrographs of, 272
Budding process of yeast, alterations of, by ultraviolet, 747

C^{14}-formate, metabolism of, in fungi, 587
Calcium, stimulation of growth of *Lactobacillus casei* by, 322
Candida albicans, effect of antibiotics on growth of, 171
Capsular polysaccharide of *Cryptococcus neoformans*, 565
Carbohydrate metabolism of bacteriophage, phosphogluconate pathway of, 490
Carbohydrates, effect of, on rate of growth of *Mycobacterium tuberculosis*, 92, 96, 100
—, role of, in nutrition of *Lactobacillus fermenti*, 671
Carbon dioxide, effect of, on dihydro-

streptomycin inhibition of pyruvate metabolism in *Escherichia coli*, 344
Carbon dioxide, effect of thioctic acid on incorporation of, into pyruvate, 744
Catalase, activity of, during sporogenesis of aerobic bacilli, 355
—, production of, by pediococci, 481
Cellular permeability, role of, in metabolism of *Brucella abortus*, 581
Chick embryos, multiplication of poliomyelitis virus in cortisone treated, 224
Chloramphenicol, reversal of action of, by natural materials, 361
Chloromycetin, reduction of, by *Escherichia coli*, 313
—, synergism and antagonism of, with other antibiotics, 454
Chlorophyll, effect of, on pigment production by *Serratia marcescens*, 479
Chromobacterium amethystinum, characteristics of, 48
—, *chocolatum*, characteristics of, 48
— *ianthinum*, characteristics of, 48
— *iodinum*, characteristics of, 48
— *orangium*, characteristics of, 48
— *violaceum*, characteristics of, 48
— — effect of sodium azide on radiation damage and photoreactivation of, 538
— *viscosum*, characteristics of, 48
Citrate, nature of adaptive lag of *Pseudomonas fluorescens* toward, 187
Citric acid cycle in *Propionibacterium pentosaceum*, 318
— —, effect of, on growth of *Mycobacterium tuberculosis*, 96
Citrovorum factor, synthesis of, by lactic acid bacteria, 466
Clostridium feseri, metabolism and nutrition of, 560
— *hemolyticum*, characteristics of, 222
— *sporogenes*, isoelectric point of, 198
— —, resistance of, to gamma radiation, 305
Cobalt, use of radioactive, for sterilization, 305
Cofactor for amino acid deaminase of *Bacterium cadaveris*, 238
Colonies, secondary, formation of, by *Bacillus megaterium*, 739
Color variation of *Serratia marcescens*, 394
Copper, growth inhibitory action of, for *Mycobacterium phlei*, 157
Cortisone treated chick embryos, multiplication of poliomyelitis virus in, 224
Corynebacterium diphtheriae, adsorption of crystal violet by, 678
— *equi*, electrophoretic mobility of, 518
— *insidiosum*, somatic antigens of, 532
— *michiganensis*, somatic antigens of, 532
— *xerose*, adsorption of crystal violet by, 678
Cryptococcus neoformans, antigens of, 565
— —, capsular polysaccharide of, 565
Crystal violet, adsorption of, by bacteria, 518, 678
Cytochrome deficient mutant of *Saccharomyces cerevisiae*, effect of glycine and protoporphyrin on, 83
Cytokinesis in *Gaffkya tetragena*, 593
Cytology of bacteriophage infection, 715

Deaminase, activity of, during sporogenesis of aerobic bacilli, 355
—, amino acid, of *Bacterium cadaveris*, 238
Dehydrogenase, activity of, during sporogenesis of aerobic bacilli, 355
Desoxyribonucleic acid, role of, in nutrition of lactobacilli, 733
Dextran, synthesis of, from sucrose by *Leuconostoc dextranicum*, 131
Dextransucrase of *Leuconostoc dextranicum*, characteristics of, 131
Dihydrostreptomycin, inhibition of pyruvate metabolism of *Escherichia coli* by, 337, 344
Dihydroxyacetone, effect of, on growth of *Mycobacterium tuberculosis*, 100

Eggs, growth of psittacosis virus in, 449
Electronmicrographs of T3 and T7 bacteriophages, 167
— — yeast bud scars, 272
Electrophoretic mobility of bacteria, 518
Encephalomyocarditis virus, susceptibility of mice to, 480
Enteric bacteria, infrared spectrophotometry of, 10
Enterobacteriaceae, relation of O antigen to polysaccharide polar bodies of, 746
Enzymatic changes during sporogenesis of aerobic bacilli, 355
Enzymes, effect of free amino acid pool levels on induced synthesis of, 496
Epidermophyton floccosum, preparation of permanent stained mounts of, 148
Erwinia carotovora, isoelectric point of, 198
Erysipelothrix rhusiopathiae, isoelectric point of, 198

Escherichia coli, adsorption of crystal violet by, 678
— —, cytology of, during bacteriophage infection, 715
— —, effect of sodium azide on radiation damage and photoreactivation of, 538
— — — — vitamin B_{12a} on growth of, 183
— — — — X-radiation on respiration of, 131
— — — — X-rays on lactase in, 378
— —, genetic analysis of auxotrophic strains of, 16
— —, growth and metabolism of ultraviolet-irradiated and photoreactivated, 252
— — inactivated by X-rays, development of bacteriophage in, 330
— —, induced resistance to gamma irradiation in, 727
— —, infrared spectra of, 10
— —, lysogenicity of, 642
— —, mutability in nutritionally deficient strains of, 16
— —, nutrition of threonineless mutants of, 203
— —, persistence of mitochondria and reductase in, during infection with T2 bacteriophage, 706
— —, reduction of chloromycetin by, 313
— —, staling in cultures of, 293
— —, variation in bacteriophages for, 113
Esters, formation of, by *Hansenula anomala*, 1
Ethyl acetate, formation of, by *Hansenula anomala*, 1

Ferrous ions, lethal and mutagenic effects of, for *Escherichia coli*, 413, 422
— —, response of *Escherichia coli* to, 413, 422
Flagella of bacteria, variability of, 628
—, variation in shape and arrangement of bacterial, 263
Fluorescin, effect of iron on production of, by *Pseudomonas aeruginosa*, 45
Formate, metabolism, in fungi, 587
Formic hydrogenlyase system of *Aerobacter aerogenes*, 617
Fructose-6-phosphate, effect of, on growth of *Mycobacterium tuberculosis*, 100
Fumarate, oxidation of, by *Neisseria gonorrhoeae*, 368
Fungi, preparation of permanent stained mounts of, 148
Fungicides, use of spores of *Myrothecium verrucaria* in assaying, 16
Fusarium vasinfectum, metabolism of formate by, 587
Fusobacteria, nutrition of, 326
Fusobacterium nucleatum, nutrition of, 326

g antigens of the Kauffmann-White schema, 222
Gaffkya tetragena, cytokinesis in, 593
Gamma irradiation in *Escherichia coli*, induced resistance to, 727
— radiation, effect of, on bacteria, 305
Genetic analysis of auxotrophic strains of *Escherichia coli*, 16
— studies on the development of streptomycin resistance in *Pasteurella pestis*, 485
α-Glucomelezitase in *Saccharomyces* strains, characteristics of, 122
Gluconic acid, effect of, on growth of *Mycobacterium tuberculosis*, 96
Glucose, formation of ethyl acetate from, by *Hansenula anomala*, 1
—, metabolism of, by *Clostridium feseri*, 560
Glucose-1-phosphate, effect of, on growth of *Mycobacterium tuberculosis*, 96
β-Glucuronidase, characteristics of streptococcal, 700
Glutamic acid, synthesis of, by *Bacillus anthracis*, 472
Glutamyl polypeptide, synthesis of, by *Bacillus anthracis*, 472
Glyceraldehyde, effect of, on growth of *Mycobacterium tuberculosis*, 100
Glycine, effect of, on cytochrome deficient yeast, 83
Growth cycle of *Bacillus megaterium*, relationship of mitosis to, 619
— factor for pleuropneumonia-like organisms, nonantigenicity of, 751
— inhibitory action of copper for *Mycobacterium phlei*, 157
Gum, production of, by *Leuconostoc mesenteroides*, 75

Haemophilus haemolyticus, characteristics of, 750
— *parahaemolyticus* n.sp., characteristics of, 750
— *parapertussis*, metabolism of tyrosine by, 509
— —, production of pigment by, 509

Hansenula angusta, vitamin requirements of, 276
— *anomala*, formation of esters by, 1
— *beckii*, vitamin requirements of, 276
— *californica*, vitamin requirements of, 276
— *canadensis*, vitamin requirements of, 276
— *capsulata*, vitamin requirements of, 276
— *minuta*, vitamin requirements of, 276
— *silvicola*, vitamin requirements of, 276
— *subpelliculosa*, vitamin requirements of, 276
Harrison, Frank Charles (1870-1952), necrology of, 227
Histoplasma capsulatum, preparation of stained mounts of, 148
Hot springs of Yellowstone National Park, thermophilic bacteria from, 193
Hydrogen bacteria, biochemistry of, 283
—, oxidation of, by *Hydrogenomonas facilis*, 283
Hydrogenase in *Azotobacter agile*, 511
— — — *vinelandii*, 511, 522
—, properties of, 522
Hydrogenomonas facilis, oxidation of hydrogen and lactate by, 283
p-Hydroxybenzoic acid, oxidation of, by *Pseudomonas aeruginosa*, 65

"Immunological paralysis" induced in mice with pneumococcal type II polysaccharide, 224
Infrared spectrophotometry of enteric bacteria, 10
— spectrum of *Micrococcus pyogenes* var. *aureus*, effect of antibacterial agents on, 750
Iron, effect of, on production of fluorescin by *Pseudomonas aeruginosa*, 45
—, response of *Escherichia coli* to, 413, 422
—, role of, in nutrition of lactobacilli, 733
Isocitric acid, effect of, on growth of *Mycobacterium tuberculosis*, 96
Isoelectric point of bacterial cells, 198

Kauffmann-White schema, g antigens of, 222
α-Ketoglutarate, oxidation of, by *Neisseria gonorrhoeae*, 368
α-Ketoglutaric acid, effect of, on growth of *Mycobacterium tuberculosis*, 96
— system of *Azotobacter vinelandii*, 565
α-Ketoisovaleric acid, a precursor of pantothenic acid, 388
Ketovaline, a precursor of pantothenic acid, 388
Klebsiella pneumoniae, isoelectric point of, 198

Lactase in *Escherichia coli*, effect of X-rays on, 378
Lactate, oxidation of, by *Hydrogenomonas facilis*, 283
—, utilization of, by rumen organisms, 554
Lactic acid bacteria, synthesis of citrovorum factor by, 466
— —, effect of, on growth of *Mycobacterium tuberculosis*, 96, 100
Lactobacilli, oral, species differentiation of, 681
Lactobacillus acidophilus, characteristics of, 681
— *arabinosus*, characteristics of, 681
— —, synthesis of citrovorum factor by, 466
— *bifidus*, nutrition of, 733
— *brevis*, characteristics of, 681
— *buchneri*, characteristics of, 681
— *casei*, calcium as a growth stimulant for, 322
— —, characteristics of, 681
— —, isoelectric point of, 198
— —, synthesis of citrovorum factor by, 466
— *cellobiosus* n.sp., characteristics of, 681
— *fermenti*, characteristics of, 681
— —, nutrition of, 671
— *leichmannii*, nutrition of, 733
— *plantarum*, characteristics of, 681
— *salivarius* n.sp., characteristics of, 681
Lecithinase from *Clostridium hemolyticum*, 222
—, modified medium for detecting, in anaerobes in feces, 225
Leuconostoc citrovorum, identity of strain 8081 of, 482
— *dextranicum*, dextransucrase of, 131
— *mesenteroides*, fermentation of sucrose by, 75
— —, isoelectric point of, 198
— —, methods for studying polysaccharide from, 446
Linolenyl-pyridinium bromide, germicidal activity of, 89
Linoleyl-pyridinium bromide, germicidal activity of, 89
Lysogenicity in *Escherichia coli*, 642

L-Lyxoflavin, interrelationship between, and thioctic acid and riboflavin in *Streptococcus faecalis*, 578

Maltose, oxidation of, by *Acetobacter melanogenum*, 233
Maltozymase, effect of free amino acid pool levels on induced synthesis of, 496
—, utilization of amino acids during synthesis of, in *Saccharomyces cerevisiae*, 601
Melanin, formation of, by *Bacterium salmonicida*, 652
Methane oxidizing bacteria, production of nitrite from ammonia by, 216
Methionine auxotrophs of *Aerobacter aerogenes*, response of, to adenine thiomethyl compounds, 310
— requiring mutants of *Saccharomyces cerevisiae*, 666
Methionyl adenosine, response of methionine auxotrophs of *Aerobacter aerogenes* to, 310
Mice, susceptibility of, to encephalomyocarditis virus, 480
Michaelis constant of dextransucrase from *Leuconostoc dextranicum*, 131
Microbacterium thermosphactum n.sp., characteristics of, 428
Micrococcus citreus, isoelectric point of, 198
— *pyogenes* var. *aureus*, adsorption of crystal violet by, 678
— — — —, effect of antibacterial agents on infrared spectrum of, 750
— — — —, effect of sodium azide on radiation damage and photoreactivation of, 538
— — — —, electrophoretic mobility of, 538
— — — —, resistance of, to phenol, 103
— — — —, staling in cultures of, 293
Microsporum gypseum, preparation of stained mounts of, 148
Mitochondria and reductase, persistence of, during infection of *Escherichia coli* with T2 phage, 706
Mitosis in *Bacillus megaterium*, relationship of, to growth cycle, 619
Morazella bovis, electrophoretic mobility of, 518
— —, isoelectric point of, 198
Motility of *Spirillum serpens*, 628
Mutant of *Neurospora crassa*, sensitivity of to constituents of medium, 434
Mutants of *Escherichia coli*, inhibition of pyruvate metabolism in, by dihydrostreptomycin, 337, 334
— — *Saccharomyces cerevisiae*, methionine requiring, 666
Mutations, induction of, to antibiotic resistance in bacteria, 354
Mycobacterium phlei, growth inhibitory action of copper for, 157
— *tuberculosis*, isoelectric point of, 198
— —, metabolism of alcohols by, 92, 96, 100
— — — — carbohydrates by, 92, 96, 100
— —, nitrogen metabolism of, 544
Mycoplana bullata, isoelectric point of, 198
Myrothecium verrucaria, assay of fungitoxicity using, 16

Neisseria caviae n.sp., characteristics of, 744
— *gonorrhoeae*, oxidation of amino acids by, 368
— — — — fumarate by, 368
— — — — α-ketoglutarate by, 368
— — — — oxalacetate by, 368
— — — — pyruvate by, 368
— — — — succinate by, 368
Neurospora crassa, sensitivity of, to constituents of medium, 434
Nitrite, production of, from ammonia, by methane oxidizing bacteria, 216
Nitrogen metabolism of *Mycobacterium tuberculosis*, 544
Nitrogenase in *Azotobacter agile*, 511
— — — *vinelandii*, 511
Nomenclature, bacteriological, official opinions on, 111
Nucleic acid synthesis in ultraviolet-irradiated and photoreactivated *Escherichia coli*, 252
Nucleus of resting and germinating spores of *Bacillus megaterium*, 378
Nutrition of acetic acid bacteria, 405
— — *Acetobacter melanogenum*, 79
— — — *oxydans*, 79
— — — *rancens*, 79
— — *Alcaligenes faecalis*, 210
— — *Bacillus anthracis*, 472
— — — *coagulans*, 141, 146
— — — *globigii*, 141
— — — *stearothermophilus*, 141, 146

Nutrition of *Brucella bronchisepticus*, 210
— — *Clostridium feseri*, 560
— — fusobacteria, 326
— — *Lactobacillus bifidus*, 733
— — — *casei*, 322
— — — *fermenti*, 671
— — — *leichmannii*, 733
— — pleuropneumonia-like organisms, 751
— — rumen organisms, 548, 554
— — *Streptococcus faecalis*, 660
— — thermophilic bacteria, 141, 146
— — threonineless mutants of *Escherichia coli*, 203
— — treponemata, 609

Oleic acid, nutrition of treponemata and, 609
Oleyl-pyridinium bromide, germicidal activity of, 89
Oral lactobacilli, species differentiation of, 681
Oxalacetate, oxidation of, by *Neisseria gonorrhoeae*, 368
Oxalosuccinic acid, effect of, on growth of *Mycobacterium tuberculosis*, 96

Pantothenic acid, α-ketoisovaleric acid as a precursor of, 388
Pantothenicless mutant of *Neurospora crassa*, sensitivity of, to constituents of medium, 434
Pasteurella pestis, development of streptomycin resistance in, 485
Pediococcus cerevisiae, production of catalase by, 481
— *damnosus*, production of catalase by, 481
— *pentosaciens*, production of catalase by, 481
—, strain 8081 of *Leuconostoc citrovorum* and genus, 482
Penicillin, effect of, on production of fluorescin by *Pseudomonas aeruginosa*, 45
—, reversal of action of, by natural materials, 361
—, synergism and antagonism of, with other antibiotics, 454
— technique for selection of auxotrophic bacteria, 348
Phenocopies in *Aerobacter aerogenes*, production of, by ultraviolet radiation, 151
Phenol, bacterial resistance to inhibition and killing by, 103
—, effect of, on infrared spectrum of *Micrococcus pyogenes* var. *aureus*, 750
Phenylacetylcarbinol synthesis by yeast, mechanism of, 440
Phenylalanine, formation of pigment from, by *Bacterium salmonicida*, 652
Phosphogluconate pathway of carbohydrate metabolism of bacterial viruses, 490
Phosphogluconic acid, effect of, on growth of *Mycobacterium tuberculosis*, 96
Photoreactivation, effect of, on growth and metabolism of *Escherichia coli*, 252
— — — sodium azide on, 538
Phylogeny of *Hansenula* species, vitamin requirements in relation to, 276
Pigment formation by *Bacterium salmonicida*, 652
— Production by *Haemophilus parapertussis*, 509
Pleuropneumonialike organisms, nutrition of, 751
— —, reduction of tetrazolium salts by, 245
Pneumococcal type II polysaccharide, "Immunological paralysis" induced in mice with, 224
Polar bodies of *Enterobacteriaceae*, relation of O antigen to, 746
Poliomyelitis virus in cortisone treated chick embryos, multiplication of, 224
Polysaccharide polar bodies of *Enterobacteriaceae*, relation of O antigen to, 746
Polysaccharides, methods for study of bacterial, 446
Population cycle of *Salmonella pullorum* in different media, 69
Pork sausage, isolation of *Microbacterium thermosphactum* n.sp. from, 428
β-Propiolactone, effect of, on metabolism of *Blastomyces dermatitidis*, 505
Propionibacterium pentosaceum, citric acid cycle in, 318
Protein growth factor for pleuropneumonia-like organisms, nonantigenicity of, 751
Proteus vulgaris, isoelectric point of, 198
Protoporphyrin, effect of, on cytochrome deficient yeast, 83
Pseudomonas aeruginosa, effect of iron on production of fluorescin by, 45
— —, isoelectric point of, 198
— —, occurrence and identification of, 746
— —, oxidation of benzoic acid by, 65
— — — — *p*-hydroxybenzoic acid by, 65
— *convexa*, isoelectric point of, 198

Pseudomonas cyanogenes, isoelectric point of, 198
— *fluorescens*, nature of adaptive lag toward citrate in, 187
Psittacosis virus, content of, in eggs, 449
Pteroylglutamic acid, synthesis of citrovorum factor from, 466
Purine bases, role of, in nutrition of lactobacilli, 733
Pyridinium salts, germicidal activity of, 89
Pyruvate, effect of thioctic acid on incorporation of carbon dioxide into, 744
— metabolism of *Escherichia coli*, inhibition of, by dihydrostreptomycin, 337, 344
—, oxidation of by *Neisseria gonorrhoeae*, 368
Pyruvic acid, effect of, on growth of *Mycobacterium tuberculosis*, 96, 100
— —, metabolism of, by *Clostridium feseri*, 560

Racemase, alanine, occurrence of, in *Bacillus terminalis*, 160
Radiation damage, effect of sodium azide, 538
— injury in *Escherichia coli*, induced resistance to gamma, 727
Radioactive sulfur, tracer studies with, on reproduction of T4 bacteriophage, 177
Reductase and mitochondria, persistence of, during infection of *Escherichia coli* with T2 phage, 706
Reiter treponeme, nutrition of, 609
Respiration of *Escherichia coli*, effect of X-radiation on, 131
Rhizobia, transamination in cell-free extracts of, 220
Rhizobium meliloti, electrophoretic mobility of, 518
Rhizopus species, metabolism of formate by, 587
Rhodospirillum rubrum, electrophoretic mobility of, 518
— —, isoelectric point of, 198
Riboflavin, interrelationship between, and thioctic acid and L-lyxoflavin in *Streptococcus faecalis*, 578
Rumen organisms, characteristics of, 548, 554

Saccharomyces cerevisiae, bud scars on, 272
— —, effect of glycine on a cytochrome deficient strain of, 83
— — — — protoporphyrin on a cytochrome deficient strain of, 83
— —, inhibition of respiration of, by surface activity of urethane, 596
— —, metabolism of formate by, 587
— —, methionine requiring mutants of, 666
— —, utilization of amino acids during synthesis of maltozymase in, 601
— strains, α-glucomelezitase in, 122
Salmonella montevideo, infrared spectra of, 10
— *pullorum*, electrophoretic mobility of, 518
— —, growth of, in different media, 69
— —, isoelectric point of, 198
— species, g antigens of, 222
— *typhosa*, adsorption of crystal violet by, 678
Sarcina lutea, electrophoretic mobility of, 518
— —, isoelectric point of, 198
Sausage, isolation of *Microbacterium thermosphactum* n.sp. from, 428
Serine deaminase of *Bacterium cadaveris*, 238
—, metabolism of, by *Clostridium feseri*, 560
Serratia marcescens, color variation of, 394
— —, effect of ultraviolet radiation on pigment production by, 479
— —, electrophoretic mobility of, 518
— —, isoelectric point of, 198
— —, methods for studying polysaccharide from, 446
Shigella dysenteriae, infrared spectra of, 10
— —, variation in bacteriophages for, 113
— *poona*, cytology of, during bacteriophage infection, 715
— *sonnei*, cytology of, during bacteriophage infection, 715
Sodium azide, effect of, on radiation damage and photoreactivation, 538
Spectrophotometry, infrared, of enteric bacteria, 10
Spirillum serpens, motility of, 628
— —, specific agglutination of, 636
Spores, bacterial, occurrence of alanine racemase in, 160
— of *Bacillus megaterium*, nucleus of resting and germinating, 378
Sporogenesis of aerobic bacilli, enzymatic changes during, 355

Staling in bacterial cultures, 293
Starch, fermentation of, by rumen organisms, 554
Stearyl-pyridinium bromide, germicidal activity of, 89
Sterilization, use of gamma radiation for, 305
Steroids, sterilization of, by gamma radiation, 305
Streptococcal β-glucuronidase, 700
Streptococcus faecalis, interrelationship between thioctic acid, L-lyxoflavin and riboflavin in, 578
— —, isoelectric point of, 198
— —, nutrition of, 660
— —, synthesis of citrovorum factor by, 466
Streptomyces coelicolor, metabolism of, 37
— —, tricarboxylic acid cycle reactions in, 37
— *griseus*, variants of, induced by ultraviolet radiation, 56
— species, microscopic study of, 281
Streptomycin, development of resistance to, by *Pasteurella pestis*, 485
—, reversal of action of, by natural materials, 361
—, synergism and antagonism of, with other antibiotics, 454
Succinate, oxidation of, by *Neisseria gonorrhoeae*, 368
Sucrose, dextran formation from, by *Leuconostoc dextranicum*, 131
—, fermentation of, by *Leuconostoc mesenteroides*, 75
Sulfur, tracer studies with radioactive, on reproduction of T4 bacteriophage, 177
Synergism of antibiotics, role of bacterial resistance in, 454

Tantalum, use of radioactive, for sterilization, 305
Temperature, effect of, on nutrition of thermophilic bacteria, 141, 146
Terramycin, reversal of action of, by natural materials, 361
—, synergism and antagonism of, with other antibiotics, 454
Tetrazolium salts, reduction of, by pleuropneumonialike organisms, 245
Thermophilic bacteria from hot springs of Yellowstone National Park, 193
— —, nutrition of, 141, 146
Thioctic acid, effect of, on incorporation of carbon dioxide into pyruvate, 744
— —, interrelationship between, and L-lyxoflavin and riboflavin in *Streptococcus faecalis*, 578
Thiomethyl adenosine, response of methionine auxotrophs of *Aerobacter aerogenes* to, 310
Threonine deaminase of *Bacterium cadaveris*, 238
Threonineless mutants of *Escherichia coli*, nutrition of, 203
Transaminase, activity of, during sporogenesis of aerobic bacilli, 355
Transamination in cell-free extracts of rhizobia, 220
Treponemata, nutrition of, 609
Tricarboxylic acid cycle reactions in *Streptomyces coelicolor*, 37
Tyrosine, formation of pigment from, by *Bacterium salmonicida*, 652
—, metabolism of, by *Haemophilus pertussis*, 509

Ultraviolet light, alterations of budding process of yeast by, 747
— radiation, effect of, on growth and metabolism of *Escherichia coli*, 252
— — — —, on pigment production by *Serratia marcescens*, 479
— —, production of phenocopies in *Aerobacter aerogenes* by, 151
— —, variants of *Streptomyces griseus* induced by, 56
Urethane, inhibition of yeast respiration by surface activity of, 596

Variants of *Streptomyces griseus* induced by ultraviolet radiation, 56
Variation in bacterial viruses, host control of, 113
— — g phases of somatic group B salmonellae, 222
— — shape and arrangement of bacterial flagella, 263
— of color in *Serratia marcescens*, 394
Vitamin B_{12a}, effect of, on growth of *Escherichia coli*, 183
— B_{12}, role of, in nutrition of lactobacilli, 733

Vitamin requirements of *Bacillus coagulans*, 141, 146
— — — — *globigii*, 141
— — — — *stearothermophilus*, 141, 146
— — — *Hansenula* species, 276

X-radiation, effect of, on respiration of *Escherichia coli*, 131
X-ray inactivated bacteria, development of bacteriophage in, 330
X-rays, effect of, on lactase in *Escherichia coli*, 378

Yeast, alterations of budding process of, by ultraviolet light, 747
— bud scars, demonstration of, with electron microscope, 272
—, effect of glycine on cytochrome deficient, 83
— — — protoporphyrin on cytochrome deficient, 83
—, mechanism of phenylacetylcarbinol synthesis by, 440
Yellowstone National Park, thermophilic bacteria from hot springs of, 193
